Computer Science student at King's College and an aspiring developer with a passion for web development and AI. Currently diving into Data Structures and Algorithms (DSAs) to strengthen my problem-solving skills. Eager to explore, create, and grow.

EDUCATION

Bachelor of Science in Computer Science (BSCS)

King's College • GPA: 3.84/4.00

Kathmandu, Nepal • 01/2028

SKILLS

- | | | |
|---------------|---------------------|---------------------|
| • C# | • JavaScript (ES6+) | • Responsive Design |
| • Canva | • Microsoft Office | • Tailwind CSS |
| • Code Review | • Notion | • Technical Writing |
| • GitHub | • Python | • VS Code |
| • HTML5 | • React | |

WORK EXPERIENCE

Xprin Technology

11/2023 - 11/2025

Frontend Developer

- Developed and maintained responsive web pages using HTML, CSS, JavaScript, and Preact.
- Integrated REST APIs to display dynamic content and improve user interaction.
- Diagnosed and resolved UI/UX issues across multiple browsers and devices.
- Optimized website performance through efficient code structure and asset management.
- Collaborated with team members to improve user experience and project delivery.

CloudFactory (Buildots Project)

Data Analyst & Data Annotation Specialist

- Contributed to AI training data projects through data analysis, annotation, and quality assurance.
- Worked on the Buildots project for approximately five months, analyzing and labeling construction-site imagery and video data.
- Reviewed datasets to ensure accuracy and consistency with project guidelines.
- Collaborated with distributed teams to meet productivity and quality targets.

Ambassador Designs & Essence Luxury Trends

IMS System Manager Intern

- Managed inventory management system records and daily operations.
- Assisted in organizing, updating, and monitoring business data.
- Supported workflow efficiency through accurate data handling and reporting.

PROJECTS

Spotify Analytics Dashboard

- Built a web application using Flask and Spotify Web API.
- Implemented Spotify authentication and user data retrieval.
- Developed dashboards visualizing listening habits and user insights.

Brodox Website

- Designed and developed responsive frontend interfaces.
- Focused on usability, responsiveness, and performance optimization.

Temperature-Based Air Conditioning Control System | Team Lead

- Led a four-member team in developing an Arduino-based automated AC control simulation.
- Implemented logic that activated the AC when temperature exceeded a predefined threshold.
- Coordinated project tasks and presented findings to instructors and peers.

VOLUNTEERING & LEADERSHIP

Pulchowk Engineering Campus

06/2023

Software Fellowship

- Participated in workshops, hackathons, and collaborative software development activities.
- Assisted peers with debugging and technical problem-solving.

AWARDS & SCHOLARSHIPS

First Runner-Up, Hult Prize 2025

01/2025

King's College

Top 5% Ranking in a Coding Challenge
